Guide to Choosing the Right Exterior Door Panel

**BUILDERS HARDWARE, INC. proudly delivers
to you the finest in exterior residential door systems.**

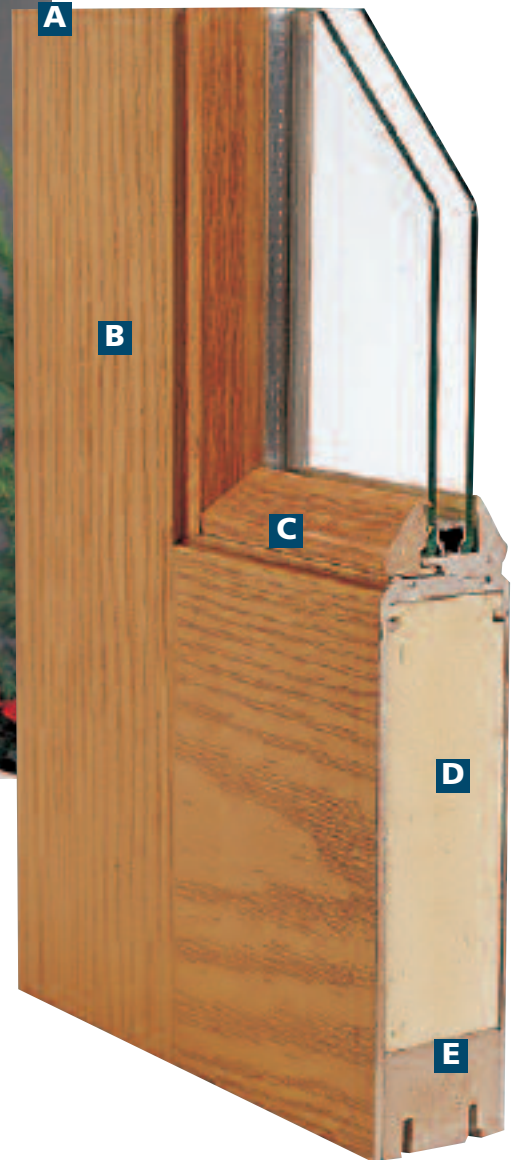

**The following pages display our
In-Stock Woodgrain and Smooth Skin Fiberglass Exterior Door selections.**

**All of the doors in this catalog can be assembled with the appropriate components to be
Florida Building Code Compliant using Notice of Product Certifications
by a Third Party Quality Assurance program.**

**BHI, Inc. is a master distributor of Plastpro® door panels. Our company ships pre-hung door units
and slabs only, to authorized dealers throughout the state of Florida.**

See information on page 11 and the back cover for code information, impact ratings and size availability.

Thank you for considering our product lines, we look forward to serving you.

Woodgrain Fiberglass Exterior Doors

- All doors shown are Florida Building Code Compliant.
 - All opaque doors meet Florida's Wind-Borne Debris large missile impact rating.
 - All doors with cutouts can use ODL doorglass. For impact rated use ODL Severe Weather® Doorglass.
 - Fiberglass Reinforced Door Skins will not rot, warp, or splinter! All our doors have deep profile panels to create stronger dimensions and enrich our door's appearance.
 - Full-Length Hydro Shield Composite Stiles provide complete waterproofing for the door's insulation. Stiles will not splinter or delaminate.
 - Composite Top & Bottom Rails prevent moisture from seeping into the door.
 - Environmentally Sound Polyurethane Foam Core (CFC Free) provides superior thermal performance and enhances sound proofing.
 - Limited Lifetime Warranty on our Woodgrain doors.
- 20 minute fire rated doors available.
 – 90 minute fire rated doors available. Flush models only.
 – Ask our sales staff about special size door panels we have available for replacement jobs.

DOOR CONSTRUCTION

- A** Hydro Shield Composite Stiles
- B** Fiberglass Reinforced Skins
- C** Removable Glass Stop
- D** 100% CFC Free Polyurethane Core
- E** Engineered Composite Bottom Rail

Florida Building Code Information

All of the doors in this catalog can be assembled with the appropriate components to be Florida Building Code Compliant using Notice of Product Certifications by a Third Party Quality Assurance program. The door panels shown in these pages can also be pre-hung and delivered to you by Builders Hardware, Inc.

If the door is solid /opaque (having no glass) it can be used where large missile impact rating is required.

Remember, Florida's Wind-Borne Debris areas (the 120 MPH wind speed zone or greater) requires impact approved products or design structural tested doors that need shuttering. It is important to know where the doors will be installed and what the requirements are for that area.

If you need impact rated glazed doors for the Wind-Borne Debris regions of Florida, you can install Severe Weather® doorglass inserts by ODL into the Plastpro fiberglass doors found in this catalog and meet that impact rating.

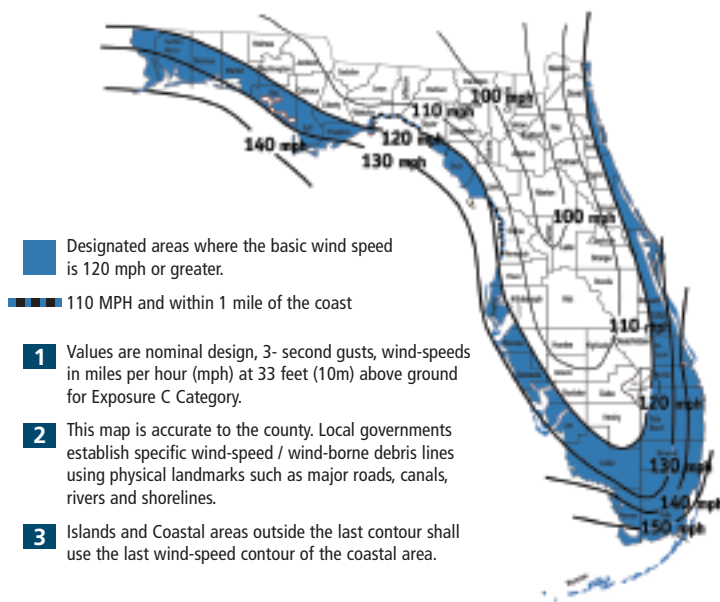

The guidelines in the product approvals should be followed. You can obtain copies of these product approvals from our sales staff or you can locate them on line yourself at www.floridabuilding.org. If you go online to get the approvals, click on the product approval box, then click on the drop down window to product or application. When the next screen pops up the only thing you need to do is, enter the product manufacturers name. Scroll down to Builders Hardware, Inc. or to Plastpro Inc./Nanya Plastics Corp. If you need any assistance from that point please contact our sales professionals who will take you through this step by step.

The High Velocity Hurricane Zone (HVHZ) is found in Broward and Dade Counties. If you need products for the HVHZ, please ask our sales professionals for our catalog showing the doors which can be used in that area.

We look forward to serving you with your door panel and door component needs.

Please look at the back page for size availability and impact ratings.
